CROP OIL CONCENTRATE

Principal Functioning Agents:
Paraffin Base Petroleum Oil.............................83%
Constituents Ineffective as Spray Adjuvant............17%
TOTAL................................................................100%

FOR AGRICULTURAL, COMMERCIAL AND INDUSTRIAL USE

KEEP OUT OF REACH OF CHILDREN

CAUTION

Personal Protective Equipment: Long-sleeved shirt and long pants, Socks, Shoes and Gloves.

First Aid: If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. If swallowed: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

General: CROP OIL CONCENTRATE is a combination of superior paraffinic oil and surfactant, designed especially for use with pesticide spray programs. CROP OIL CONCENTRATE may be used with products registered for: agricultural, citrus, forestry, industrial, municipal, non-crop land, ornamentals, rights-of-way, tree crops, turf and other uses.

Directions for Use: READ ALL DIRECTIONS AND NOTICE. In the treatment of new varieties or highly inbred lines, a test area is suggested. DO NOT use CROP OIL CONCENTRATE in sprays applied during periods of extreme high or low temperatures or humid conditions. CROP OIL CONCENTRATE may be applied by ground, aerial or CDA equipment. Some pesticides have stated adjuvant use rates. In all cases the pesticide manufacturer’s label should be consulted regarding specific adjuvant use recommendations and that rate followed. Do not add adjuvant at a level that would exceed 5% of the finished spray volume.

General use rate: 1 to 8 pints per acre.
Follow label of pesticide being used.

Mixing: Fill spray tank ½ full of water, add the desired amount of herbicide and continue filling. Add correct amount of CROP OIL CONCENTRATE last and continue agitation.

ENVIRONMENTAL HAZARDS: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

Storage: Store in a cool, dry place. Store in original container. Keep tightly closed. Do not reuse empty container. If stored below 20°F (-6°C) for an extended period, product may become cloudy and thicken. Raise temperature above 32°F (0°C) and product will return to clear, fluid state.

Disposal: Do not contaminate water, food or feed by storage or disposal. Wastes may be disposed of on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org.
